The Aqua Technics Pools Story

The purchase of your very own swimming pool is an exciting time! A cool-off in summer, recreation for the kids and poolside barbecues have infinite appeal, yet with so many companies to choose from, how can you be sure you are getting the very best pool for your investment?

Look no further.

Aqua Technics Pools has been manufacturing award-winning fibreglass pools since 1976. Right from day one, we knew that if we wanted to be the leading swimming pool manufacturer in Australia, we also had to lead the way with product development and technology. So we began burning the midnight oil researching new manufacturing methods and materials.

And we have been ever since.

That's why Aqua Technics Pools has the best range of technologically advanced, award-winning swimming pools in Australia. You can rest assured your pool has been built to Australian Standard 1838 under license number BMP 520101, includes an Extended Lifetime Structural Warranty and has award-winning Pool ColourGuard® protection, with brilliant colour guaranteed not to fade.

We stand behind our pools so you can take the plunge with confidence, knowing that you have invested in the very best swimming pool available – a pool built stronger to last longer from the team at Aqua Technics Pools.

PoolColourGuard®
Advanced Technology in Fibreglass Swimming Pools

The Aqua Technics Edge

What sets us apart from the rest

FADE FREE

Aqua Technics pools have patented Pool ColourGuard® surface protection, which resists the effects of UV rays and chemicals, guaranteeing pool colour that will not fade.

QUALITY ASSURED

Certified to build to AS/NZS 1838 under license BMP 520101. We are measured and tested by an authorised, independent auditor. Anyone can say they build to the Standard. For your peace of mind always ask for a license number. We also comply to the AS/NZS ISO 9001 Quality System.

LIFETIME WARRANTIES

Pool ColourGuard® Lifetime Interior Surface Guarantee and Extended Lifetime Structural Warranty - our commitment to providing extended warranties above those standard in the SPASA contract.

ANTI-MICROBIAL PROTECTION

Microtech Anti-Microbial Pool Protection prevents surface algae growth, making it exceptionally hygienic and safer for your family. It's 100% safe and gentle on the human body.

PRECISION MOULDS

New designs are built using a 5-axis CNC router with computer aided robotics ensuring moulds built to exacting tolerances. The edge beams are true, the shapes geometrically perfect and the surface finish is without peer.

SUPERIOR STRENGTH

Full sized structural ribs, fully supported steps and bench seating and a wider edge beam mean the pool is independently structural and has no need for secondary engineering works. New high strength, corrosion resistant fibreglass produces a stronger, stiffer pool - up to 20% stronger.

SUPERIOR MATERIALS

All pools are manufactured using new generation, high performance, corrosion resistant, eco-friendly fibreglass with improved strength and stiffness. Our onsite gelcoat manufacturing facility means daily batching of materials for a better product. Only specialty materials are used - no general purpose products.

First-Class Manufacturing Facility

AquaTechnics pools are built at our state-of-the-art production facility, purpose built for manufacturing fibreglass swimming pools. The design and layout of our factory coupled with quality equipment and innovative processes enables us to build a technologically superior product of the highest quality.

We can proudly boast to having our own gelcoat production division run by our two in-house chemists. We are able to freshly mix our gelcoats on a daily basis, allowing them to be modified to suit ambient weather conditions.

Rest assured that when you purchase a pool from our superior fibreglass range, the quality will be second to none.

Quality Promise

Each of our pools is manufactured in accordance with a Quality Management System as per the requirements of the International Standard ISO 9001 and supplied to comply with AS/NZS 1838:1994 under BMP No 520101. Obtaining accreditation means being measured and tested by an authorised, independent auditor and is not easily achieved. **Any pool builder can say they build to, or better than, the Australian Standard but for your peace of mind always ask for a license number.**

The strength of our pools is backed by an **Extended Lifetime Structural Warranty**. We are also the only swimming pool company in the world offering a **Lifetime Interior Surface Guarantee***.

Safety features include a modern range of safety ledge pools, swim-outs or generous bench seating in every pool along with non-slip surfaces.

EXPERIENCE TO MATCH

Aqua Technics has been manufacturing fibreglass swimming pools for 40 years so you can trust we have the knowledge and expertise to build the best swimming pool available today. Our pools are purpose-built to stand the test of time and are exported to countries all over the world.

Swimming Pool Specifications

Long sweeping benches, seats and swim-outs are an important part of any great pool design. The support structure that we build in as part of the manufacturing process ensures that any benches, seats or swim-outs remain level with the rest of the pool. The support struts are constructed from fibreglass, therefore becoming part of the pool shell to guarantee its integrity and strength.

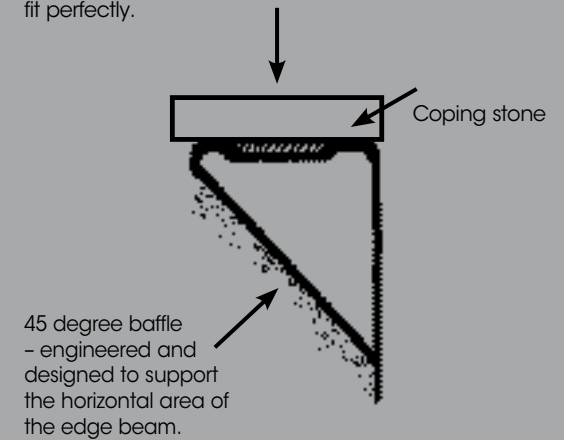

Step Reinforcement

Each walk-in step reinforced with rot-proof polyurethane covered with double thickness fibreglass lay-up.

Edge Beam Detail

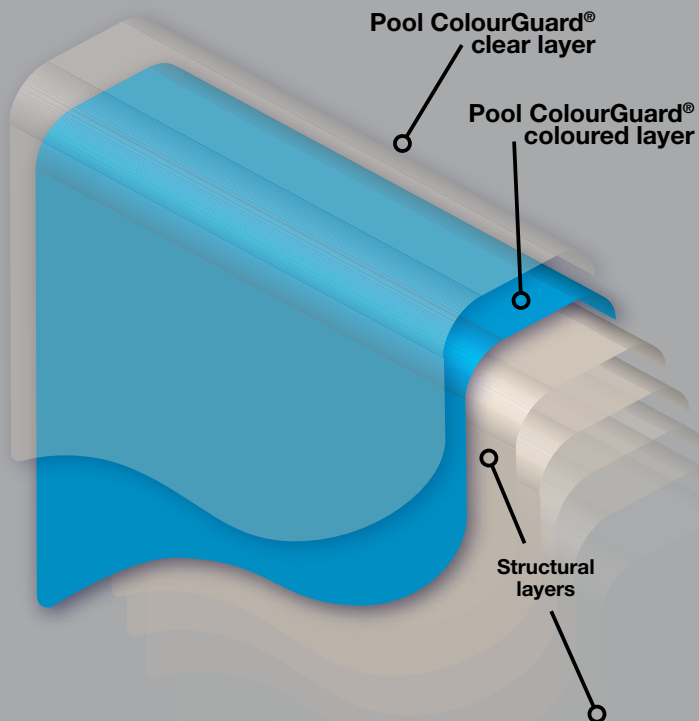

Non-slip surface or optional pavers designed to fit perfectly.

The design of the edge beam coupled with the width at 200mm means that your pool is structurally sound without having to add any secondary engineering works*.

*Individual site conditions should be referred to local engineers or authorities for verification.

SPECIALISED DUAL COAT SYSTEM.

Two layers are merged to provide the extraordinary protection offered by Pool ColourGuard®.

Specific ultra violet light absorbers and stabilisers provide unparalleled protection against the damaging effects of UV rays.

Pool ColourGuard®

with a Lifetime Interior Surface Guarantee*

PoolColourGuard®
Advanced Technology in Fibreglass Swimming Pools

POOL COLOUR THAT DOES NOT FADE

Incorporating patented technology, your pool is guaranteed to look as good as the day it was installed as it is protected from colour loss and weathering.

SUPERIOR DEFENCE AGAINST CHEMICALS AND WATER

Accidental and unintended readings of low pH and high chlorine levels will not harm the pool's brilliant colour or textured finish.

WITHSTANDS THE EFFECTS OF UV RAYS

Pool ColourGuard® acts like sunscreen on your pool. Its ability to withstand UV radiation has been tested and proven through a QUV Accelerated Weathering Test, administered in compliance with American Standard Testing Methods (ASTM) G154-06. Special ultra violet absorbers and inhibitors minimise any degradation of the surface by UV light.

BRILLIANT HIGH GLOSS FINISH

Never before seen on swimming pools, Pool ColourGuard imparts a very high gloss to the pool's surface, which is maintained year after year.

NO OTHER PRODUCT CAN OFFER YOU THESE BENEFITS

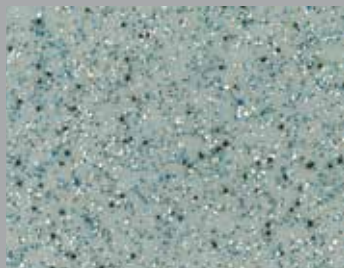

Don't be fooled, there is no equivalent available on the market.
